

WIRE
BY DESIGN

ANCHOR

Extreme durability, one-of-a-kind construction, mesmerizing intricacy; these are a few of the features that **ANCHOR** offers which set it apart from alternatives. Woven on a specialty loom, this pattern is 2-sided, giving the designer two designs to choose from in a single product.

ANCHOR is especially well-suited as the lower panel(s) in elevator cab interiors due to its resistance to dents from heavy foot traffic.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.
