

BULKHEAD

WIRE
BY DESIGN

BULKHEAD is a highly-detailed oblong opening architectural mesh. The twin wires in the width dimension add detail that garners notice in interior applications such as railing infill and room dividers. The flattened wires in the length dimension are woven such that there is no “front” or “back” side, making this a perfect solution for an open floor plan environment.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.
