

WIRE
BY DESIGN

CLAD

The larger scale of **CLAD** makes it a preferable pattern for exterior applications such as structure façade. The unlimited length, which is typically the structure height, makes large uninterrupted panels possible. The heavy-duty wire used makes **CLAD** suitable in the most demanding environmental conditions.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.

PATTERN SPECIFICATIONS
