

COMPASS

WIRE
BY DESIGN

COMPASS consists of a unique double round wire pattern that produces fine detail that is clean and simple. Texture and a high degree of consistency make **COMPASS** an excellent choice for interesting interior room dividers and railing infill. Custom fabrication capabilities from bending right angles, forming curves and cutting shapes and more, are possible due to the nature of this pattern.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.
