

WIRE
BY DESIGN

HIP

Flexible enough to warp around a 6" column, yet dense enough to conceal a substrate, **HIP** lends itself well to surfacing applications. Alternatively, when pulled taut, this pattern will yield a monolithic golden metallic canvas. Ideally suited for elevator cab interior cladding and bar / reception desk cladding, **HIP** adds beauty and durability to its environment.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.

PATTERN SPECIFICATIONS

Open Area	1%
Weight	3.51 lbs/sq ft
