

# OUTRIGGER

**WIRE**  
BY DESIGN

Strong enough for exterior, but tactile enough for interior applications, the opening size of **OUTRIGGER** makes it a perennial favorite amongst designers for interior curtains that make a statement. Because **OUTRIGGER** balances between a strong construction and intricate detail, it can be engineered as a building's sun shading exterior element, and be brought inside as a lobby feature wall without changing the appearance of the mesh.

*At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.*
