

SHEAR

SHEAR has an attractive dimpled appearance with the durability required for high traffic areas making it a historically popular choice for elevator cladding. The large amount of surface area create a monolithic sheet from a distance, but intricately woven wire upon closer inspection reveals a purpose-built architectural element.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.
