

TREADWAY

WIRE
BY DESIGN

Flexible enough to wrap around a 6" column, yet dense enough to conceal a substrate, **TREADWAY** lends itself to surfacing applications. Alternatively, when pulled taut, this pattern will yield a monolithic antique bronze metallic canvas. Ideally suited for elevator cab interior cladding, and bar/reception desk cladding. **TREADWAY** adds beauty and durability to its environment.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.
