

**Pattern Specifications**

Open area: 1%

Weight: 3.36lbs/sq ft

Max width: 240"

Max length: 78"

Material: Stainless Steel

Attachment method: Frame, Flat Bar & Clevis

**Pattern Name: BEVEL**

Like walking past an offset picket fence, you will observe a continuously changing view when moving past Bevel. The identically crimped alternating wires are offset from one another by perpendicular straightened round rods, allowing for uncommon depth in a woven mesh. Ideally suited for elevator cab interior cladding, bar/reception desk cladding, and room divider, Bevel adds beauty and durability to it's environment.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.

**Common Applications**

- Desk Facades
- Elevator/Wall Cladding
- Room Divider

**Environmental Improvements**

- Regional Materials
- Building Re-use

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our Product Specifications, we can customize a wire mesh to your particular project needs.
