

Pattern Name: KEYSTONE

Pattern Specifications

Open area: 50%

Weight: 1.92lbs/sq ft

Max width: 240"

Max length: 78"

Material: Stainless Steel

Attachment method: Frame

Remarkable light reflection is the hallmark of the Keystone pattern. The flatness of the wires creates more surface area from a distance appearing to be solid squares angled in the same direction. When viewed close up this pattern allows the viewer to understand the complexity of a woven mesh. Ideally suited for elevator cab interior cladding and bar/reception desk cladding, Keystone adds beauty and durability to its environment.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.

Common Applications
Bar/Reception Cladding Elevator Cab Cladding

Environmental Improvements
Regional Materials Building Re-use

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our Product Specifications, we can customize a wire mesh to your particular project needs.
