

OXIDE

OXIDE is strong enough for exterior, but tactile enough for interior applications. The opening size of **OXIDE** makes it a perennial favorite amongst designers for interior curtains that make a statement. Because **OXIDE** balances between a strong construction and intricate detail, it can be engineered as a building's sun shading exterior element, and be brought inside as a lobby feature wall without changing the appearance of the mesh.

At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.

Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.
