

**WIRE**  
BY DESIGN

# TREFOIL

**TREFOIL** is a small scale oblong opening woven mesh that is supple enough to make tight curves but engineered to withstand the elements. The edges can be outfitted with a great number of conditions including, but not limited to, exposed and cut to size with softened edges, buried inside a hem edging, or sandwiched between flat bars. Let a Wire By Design sales professional make a recommendation that will fulfill your design intent and budget requirements.

*At Wire By Design, the possibilities are only limited by your imagination. In addition to the designs featured in our product specifications, we can customize a wire mesh to your particular project needs.*

*Wire By Design architectural wire mesh is manufactured in Lancaster, Pennsylvania.*
